Safari warns you when a website has an expired certificate. This website's certificate expired 100 days ago. This may happen if the website is misconfigured, an attacker has compromised your connection, or your system clock is incorrect. Your system clock is set to Saturday, September 15, 2018. If this is not right, [fixing the clock](#) may address this warning.

To learn more, you can [view the certificate](#). If you understand the risks involved, you can [visit this website](#).

9. Click on "Visit Website".

 **Are you sure you want to visit this website on a connection that is not private?**

You will have to modify your system settings to allow this.

[Cancel](#) [Visit Website](#)

10. Enter information as mentioned in the below form and click on Change Password.

Change Account Password

Username
Your wifi username, add @iitgn.local
