## How to install and register DSC Token for Mac

- 1. Check Java is installed or not. If not installed then install the Java from Internet.
- 2. Download Token driver/software from the respective website. If the token is from Watchdata Proxkey then download it from below website.

## https://www.support.cryptoplanet.in/downloads.php

3. Run the downloaded software. While running if you get the below message then allow the installation of this software by following below steps.

- 4. Click on Apple icon form the top left corner. Select "System Settings".
- 5. Select "Privacy & Security". Scroll Down on the right side and select "Open Anyway".

6. Enter the System Admin Password and Click on "Modify Settings".

7. Click on "Continue".

8. Enter the Admin Password. Click on "Install Software".
